

THE QUARTERLY CHILL

REFRIGERATION WHEN YOU NEED IT, WHERE YOU NEED IT

Yippee, my favourite time of year is fast approaching! Cold, dark evenings toasting marshmallows on the fire and helping my amazing customers with the extra cold storage they need for their Christmas stock(ing). *Coolio x*

If you haven't booked yet, please don't leave it too late to book for Christmas, this year is filling up fast.

CASE STUDY | NATIONAL COMPOSITES CENTRE

In September we supplied a 20ft refrigerated container for additional storage to the National Composites Centre, who have utilised our services since 2012.

Jools said "We needed additional storage because we're incredibly busy working on some incredible R&D projects from designing the future of flight to sustainable composite railway bridges. It means that we are going through more stock and faster so we need to have extra storage to keep up with demand. We also are using lots of different types of materials and so need extra space to house them all."

The National Composites Centre is the UK's world leading composites research and development centre. Its headquarters, just outside of Bristol, is home to the world's most advanced automated composites manufacturing technology which allows companies to perform R&D at an industrial scale. It brings together the best people and the best technologies to solve the most complex engineering challenges of our time. These advanced materials often are a mix of fibres and resin and are all around us in everyday products we use. Many people will have heard of the most famous composite materials carbon fibre and glass fibre however the NCC works with all types of advanced materials to create products that are lighter, stronger, smarter and longer lasting. Because of their strength and weight, composites are often used where there can be no room for compromise. They are used to make aircraft wings and engines (over 50% of a plane is made of composites), space vehicles, bulletproof vests, prosthetics like running blades, cars, bikes, fishing rods, construction materials such as decking, skis...the list goes on.

Some composite materials come 'ready mixed' in the form of fibres that have been pre-impregnated with resin and these come with a limited shelf life. The NCC chill and freeze these products to enable them to use just the amount needed, when needed. This allows them to buy in bulk and use in small quantities saving cost, waiting time for deliveries and shipping miles – thus making their already green products even greener.

Quarterly FAQs

How many pallets can you store in a 40ft refrigerated container?

A 40ft refrigerated container will store 18 to 20 euro pallets (800mm x 1200mm) or 17 standard pallets (100mm x 1200mm) depending on how they are loaded into the container.

Are refrigerated containers supplied with a ramp?

Yes all of our refrigerated containers are supplied with a metal ramp for easy access for loading cages and pallet trucks. The ramps can be up to 2 metres long so please take this into consideration when planning where you will site the unit.

Win a baby Coolio!

Prize for the coolest Google review by 31st December.

How to Enter

Leave a cool Google review, take a screenshot (so he knows to enter your review) and send it to:

coolio@teamrefrigeration.co.uk

Winner announced in our next newsletter.

Latest Winner:

Kwame @ The Hurlingham Club

"Very good unit to have when operating outdoors. Team Refrigeration are one of the best providers. Efficient, friendly and very helpful, will always recommend."

Team Refrigeration

Coolio saves the day

We received an urgent call one Thursday. Briggs Marine needed a 10ft refrigerated container delivered the next day, so it was time for Coolio to work his magic.

Briggs Marine is a leading UK marine contractor offering services across a range of industries specialising in coastal, offshore, and nearshore operations. The Company's strengths are in

delivering safe, high quality, cost-effective, multi-discipline marine-based solutions in diverse and challenging environments, on time and budget.

Time was critical as the container needed to be shipped out to a rig and by the close of play the very next day. The unit was delivered to specification, on time and on budget.

“Team Refrigeration were extremely helpful in supplying us with a refrigerated container in a timely manner. It can be a challenge supplying oil rigs due to their tight regulations and technical specifications; however, Ricky ensured all our queries were dealt with promptly and tailored his operation to suit our needs. ”

Emma, Briggs Marine

Meet the team

Phil Pettitt

Driver and Mobile Refrigeration Veteran

Phil has been involved with the business for many years, almost from the very beginning. Although Phil officially retired some years ago, he still loves to get stuck in.

Whether it is helping out in the depots, keeping the fleet spick and span or driving all over the country delivering and collecting, Phil does it all.

Free cool stuff

Our emergency action plan stickers are still proving to be useful and popular, so we are continuing to send these out free of charge. Please drop Coolio an email with your name and address if you would like some sent to you. We are also happy to send these out to multiple locations if that is helpful to you. Coolio -

coolio@teamrefrigeration.co.uk

Coolio's cocktail MULLED CIDER

INGREDIENTS

1LTR CLOUDY CIDER
HALF A LITRE OF GINGER BEER
1 ORANGE
HANDFUL OF CLOVES
2 CINNAMON STICKS
SPASH OF HONEY
SPICED RUM

DIRECTIONS

Stab a few holes into the orange and poke your cloves in. Pop into a large saucepan, pour over your cider, ginger beer, add your cinnamon sticks and splash of honey. Put the lid on and bring to the boil. Once boiled, turn the heat off, add a measure or two of rum.

Pour into a jug, orange 'n' all and you are ready to serve.

Win a bottle of Coolio's champers

Would you like to feature in our newsletter as our customer of the quarter? If so drop us an email telling us how Coolio helped you keep cool and win a bottle of Coolio's Champers.

That's all for another quarter, we cannot believe we are a year into the newsletter already and hope you are all staying cool. As ever if there is anything we can help with, please get in touch and we'll be more than happy to help.
